PROVOST&PRITCHARD
CONSULTING GROUP

About Provost & Pritchard

The State Water Resources Control Board (State Board) has contracted Provost & Pritchard, a consulting group specializing in water resources, to serve as the Administrator for the Las Deltas Mutual Water Company (MWC).

The State Board established the Safe and Affordable Funding for Equity and Resilience (SAFER) Program to help water systems meet safe and reliable drinking water standards. **Provost & Pritchard is funded by this program to provide technical and managerial resources and financial assistance for a path to safe water for residents and families in the Las Deltas community.**

Why Was Las Deltas Assigned an Administrator?

Las Deltas MWC is currently under a compliance order from the State Board for failure to maintain system pressures and for Total Trihalomethanes (TTHM) levels that exceed the safe drinking water limits set by the State Board. Provost & Pritchard has been assigned as Administrator to address these issues and oversee the system while a long-term solution is implemented.

Las Deltas MWC Service Area

The Administrator's Role in Your Community

Provost & Pritchard's team of technical consultants will be working closely with the Las Deltas MWC to **assess the conditions of the existing water system, explore different solutions for the problems in the system, and acquire additional funding for improvement projects**. As the Administrator, Provost & Pritchard also subcontracts with operators to perform water systems maintenance and repairs on system infrastructure.

Las Deltas MWC can expect quarterly community meetings with Provost & Pritchard to receive updates on the water system. Provost & Pritchard will share information about emergency response plans, information about additional contractors working on the water system, and water system financial reports. The community is encouraged to participate in community meetings to stay informed on significant matters related to the water system.
